^ Molding Lightens up

Orac Decor has created a new series: cornice moldings for indirect lighting. The polyurethane moldings accept a variety of cove molding light fixtures and won't cause scalloped or uneven light dispersion, according to the manufacturer. The molding comes ready for painting, glazing, or faux finishing, and can be installed with the same tools used for installing wood products. Orac says the product requires a minimum of installation labor, little to no repair work, and is lightweight and strong. For additional information, visit www.oracdecor.com. **To find Orac Decor at PCBC, visit Booth 138 in the South Hall, Moscone Center.**

Cleaner Heat >

Dimplex has introduced Purifire, an air-treatment system found in selected Dimplex electric fireplaces. The system uses an electrostatically charged filter medium that attracts and traps harmful airborne particles such as dust, spores, pollen, and mold. Fireplaces equipped with Purifire do not require permits, piping, or venting, and are designed to be installed anywhere. The system also uses no combustion and adds no moisture to rooms, which preserves the building envelope. Purifire's air filter operates with the heater or the air-circulating fan to provide continuous, quiet cleaning, according to the manufacturer. On average, the system circulates and cleans the air of a room four times per hour. An automatic sensor indicates when the filter needs to be replaced. For additional information, visit www.dimplex.com. **To find Dimplex at PCBC, visit Booth 6335 in the North Hall, Moscone Center.**

< Air Grilles Blend Into Decor

Worth Home Products manufactures a wooden return-air grille that replaces conventional white metal grilles. Installed in walls or ceilings, the product is designed to blend in with home decor, and can be painted to match particular color schemes. According to the manufacturer, the grilles combine safety features, air-flow performance, and versatility. Made from paint-grade poplar and Baltic birch wood, the grille consists of the wooden grille and a metal sleeve that installs with no wall modification. This product is available in 36 sizes that accommodate all standard return-air openings and filters. For additional information, visit www.worthhomeproducts.com. **To find Worth Home Products at PCBC, visit Booth 2503 in the South Hall, Moscone Center.**
